OUR SCHOOL IMPROVEMENT PRIORITIES 2026–27

PENRHIWCEIBR PRIMARY SCHOOL

At Penrhiwceibr Primary School, we want every child to thrive academically, socially and emotionally. This year, we are focusing on three priorities to make learning even better for every pupil.

01

Raising Achievement in Mathematics

We will strengthen mathematics teaching so pupils build confidence, fluency, reasoning and problem-solving skills. We want children to enjoy maths, understand ideas deeply and use their learning in real-life situations.

02

Developing Independent Learners

We will help pupils become resilient, confident and independent learners. Children will be encouraged to take ownership of their learning, make decisions, solve problems and reflect on their progress—building skills for the future.

03

Promoting a Love of Reading

We will develop fluent, confident readers who enjoy books and reading for pleasure. By working in partnership with families, we will encourage reading both in school and at home.

WORKING TOGETHER

Our priorities are informed by self-evaluation, pupil outcomes and our commitment to continuous improvement. By working together with pupils, parents, staff and governors, we can help every child to **care, grow and succeed together.**
